Dear colleagues

I am very glad that I can invite you and I hope to welcome you later in ancient Nitra to a traditional surgical professional event. I am convinced that the twenty-third Nitra Surgical Day and the traditional Coloproctological Day will appeal to you with their professional program.

In a flood of events on the subject of mini-invasive colorectal surgery, we have somehow forgotten the fact that in clinical practice more than 60% of patients with advanced and advanced colon and rectal carcinomas in whom miniminvasive surgical modalities are only applicable to a certain extent.

*Therefore, we chose **“Advanced Colon and Rectal Cancer”** as the main topic of the event. There is no doubt that there is a need to find the right path, or even better consensus between oncologist, gastroenterologist and colorectal surgeon, for optimal therapy for this group of patients. We organize the event in cooperation with the Slovak Society of Gastroenterology and oncologists and therefore I believe that after its end we will move forward in terms of determining the recommended procedures for clinical practice. I am convinced that invited renowned lecturers from near and far abroad will enrich our knowledge with their own long-term experience in clinical practice.*

Nitra is very closely connected with the historical development of the Slavs in the territory of present-day Slovakia. Cyril - Methodical tradition will breathe on you every step of the way and the renewed Basilica of Sts. Emeram at Nitra Castle will delight you with its beautiful decoration and architecture. Come to gain new knowledge, meet new colleagues and breathe the atmosphere of ancient Nitra and its beautiful surroundings.

Assoc.Prof Jozef Korček M.D.PhD.

Chairman of KS SČHS

TVARUJTE.

Podložka s harmonikovým krúžkom s tvarovateľnou technológiou. Umožňuje jednoduchšiu aplikáciu vrečka, viac komfortu – a zároveň prináša osvedčenú ochranu kože.

Tvarovateľná technológia vytvára elastické obomknutie, ktoré sa prispôsobí rôznym tvarom a veľkostiam stómie a následne kopíruje jej pohyby pre lepšiu tesnosť. Výsledkom je neuveriteľne bezpečné utesnenie.

Viac ako 95% pacientov, ktorí začali s tvarovateľnou technológiou, si udržalo zdravú kožu.¹

Viac informácií získate na našej bezplatnej StomaLinke 0800 800 111
www.convatec.sk

Nastal **čas tvarovať**.

Žiadne medzery. **Menej** podtekania. **Zdravšia** koža.

Dostupná vo viacerých možnostiach pre poskytnutie slobody a sebavedomia vašim pacientom žiť život naplno.
